SPECIFY SERVICE INSTRUCTIONS AND WARRANTY TERMS

FCC Compliance Statement

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to correct the interference by one of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.

FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Industry Canada Statement

This device complies with RSS-247 of the Industry Canada Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Industry Canada Radiation Exposure Statement

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm between the radiator & your body.

Instructions & Warranty

The manufacturer is not responsible for any loss or radio/TV interference caused by unauthorized modification of the product.

Such modification will void the warranty of the product as well as the user's right of use.

WARNING

- The product must be assembled and installed by an adult.
- Before using, read all instructions on this manual thoroughly and follow operational instructions, warnings on this manual and printed on the product.
- To avoid entangled power cord, do not place it around the baby bed or other infant furniture. Keep this product and its power cord out of children's reach.
- Especially, the power cord should be installed carefully while keeping it out of children's reach
- Never use the product near bath tub, sink, washing machine and in wet basement to avoid moisture.
- The product is not designed for medical monitoring, and requires a grown-up's protective supervision on its use.
- To avoid overheating of the product, do not expose the product to direct sunlight; do not
 install or use near a heat source such as heater, radiator, cooking devices (ex: electric
 stove or oven) and other warming devices (ex: audio amplifier, TV, etc.).
- Make sure to keep ventilated while using the product.
 Avoid pillar or furniture that may block ventilation, when installing the product.
- Make sure to use the power adaptor provided. If used with unidentified adaptor, it may damage the product. The power adaptor must be used with regular household electric supply.
- Avoid sharp, pointed objects around the adaptor's cable, not to damage the cable.
- Be warned and never hold the cable's stripped part when connecting / disconnecting the adaptor to/from the wall outlet.
- To avoid entangled cable lines, avoid using cable extension for adaptor's power cord.
- The product's servicing is allowed only to authorized Hanwha Techwin service personnel.

- When using the product for children's care, be careful to keep the product out of children's reach
- The product partially contains component which might cause respiration difficulty.
 Accessories and small parts of the product should be stored keeping out of children's reach.
- The product is not designed to replace responsibility of human supervision on children.
- The product is not equipped with device of immediate notification to adult with accidental/sudden children's move; it requires periodic checks and human supervision.
- This appliance and its antenna must not be collocated or operation in conjunction with any other antenna or transmitter. A minimum separation distance of 20 cm must be maintained between the antenna and the person for this appliance to satisfy the RF exposure requirements.
- Please note that the content of a micro SD card used for other purposes may be deleted when it is mounted in the camera.

GETTING STARTED

Features

What's Included

Part names and functions

Power Supply

Features

Dedicated Wi-Fi Product

- The camera is registered through the Wi-Fi connection.

· Easy to install

- The Wi-Fi Direct button allows easy connection to a wireless router.
- Simply visit the home page (www.samsungsmartcam.com) and download and install the program without a separate installer program.

· Remote monitoring

- Whenever and wherever if you are in the Internet enabled environment, remote monitoring is ready for you.
- PC, laptop or smart phone can be used for monitoring.

Real-time alarm

 When a motion and sound are detected, your smartphone will generate real time alarms.

· Saving in SD card

- When an event occurs, the user can save the video in their SD card.

Downloading a recorded video

 You can download motion detection/audio detection/manually recorded video to the user's PC or smartphone (Android).

Two-way Audio

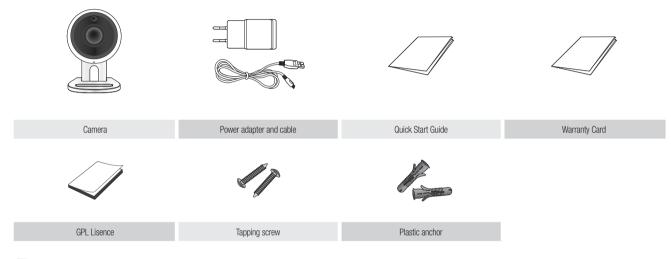

- With the built-in speakers and microphone, you can make Two-way communications.
- However, it is available only with the smart phone. (Not applicable to the PC or laptop computer.)

8

6

What's Included

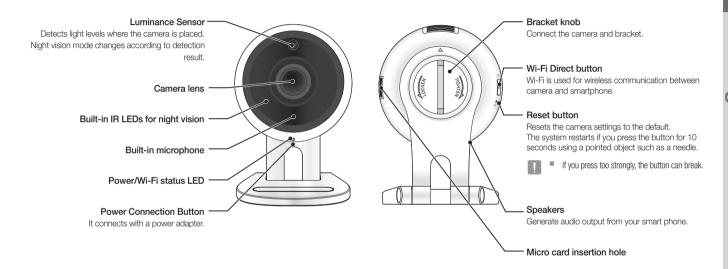

Check for components when opening the product package.

- \blacksquare Keep the packing container. You will need the serial number later to register the camera.
- Adapter may be different upon the destinations.

Part names and functions

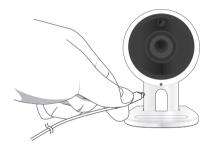

Power Supply

Plug-in the camera power adapter to the wall outlet and connect the camera as shown.

- Make sure to use the provided power adaptor. If you use an adaptor other than the power supply adaptor provided in our package, the product may not operate properly.
- It takes about 30 seconds to reboot the camera completely.
- When the camera is turned on, the LED blinks red.

❖ LED status

LED indicator shows operational status with colors.

Refer to table below for detailed meaning of the LED indicator.

Color	Status
Red	Booting up
Red Blinking	Booting completed / Establishing network connection
Blue Blinking	Connecting to the network.
Blue	Local connection established
Green	Connection to server completed / Normal operation
Yellow/Orange	Waiting to connect with a wireless router
Purple	Updating firmware

Installation & Network Connection

Installation	9
Precautions	9
Installing on the wall and ceiling using screws	9
Adjusting the camera angle	10
Network Connection and Settings	11
Precautions	11

Connection using the Wi-Fi Direct function

Installation

Precautions

11

- 1. Install the camera in a location with a good Wi-Fi signal and no interference.
- 2. Keep it away from humidity such as around the humidifier.
- Keep it away from direct sunlight, strong light or dust; install it in a place with clear view.
- 4. Do not install it in a place where there are a lot of obstacles.
- Keep the lens clean at all times.Wipe off the dust with a soft cloth.

Installing on the wall and ceiling using screws

- 1. Remove the rubber packing attached to the camera stand.
- 2. Take out the screws (M3xL20) and anchors (Φ5x25mm).

When installing on a wooden wall

 Fix the bracket to the wall using screws, as shown in the next image. Using a Phillips screwdriver, fasten screws in 2 screw holes on the wall on which the camera is to be installed.

When installing on a concrete wall

Fix the bracket on the wall using screws and anchors. First, mark the wall on which the camera is to be installed as shown in the figure.

- 4. On the mark, drill a hole to a depth of about 3cm in the wall using a drill bit and drill with a 5mm diameter for concrete. Remove any debris remaining in the hole after drilling.
- Use caution when drilling to avoid injury.

Insert an anchor in each of the 2 holes for the screws, then hit the back of the anchor with a hammer or a rubber mallet until it is completely inserted.

- Insert a screw in each of the 2 holes in the wall, and tighten the screws using a Phillips screwdriver
- 7. Connect the adapter plug to the power terminal of the camera.

 If the bracket hinge becomes loose, remove the rubber cover and tighten the screw using a screwdriver.

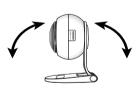

Adjusting the camera angle

- Place the camera stand on a flat surface.
- 2. Adjust the camera's shooting angle as appropriate.

If the bracket hinge becomes loose, remove the rubber cover and tighten the screw using a screwdriver, then adjust the direction of the camera.

Network Connection and Settings

Precautions

- The wireless network access may fail, depending on the communications environment.
- For details about the network settings and password, contact your network administrator or service provider.
- For a specific Internet service requiring user authentication, you may not access
 the service. If this is the case, contact the service provider.
- · Do not access the unauthorized network.
- The farther the distance from the Wireless Access Point, the longer time the network connection may take.
- If you fail to access the selected wireless network, try a different Wireless Access Point to make access
- For more information about the router or the wireless connection, refer to the documentation of the router or contact the router manufacturer.
- If the camera is connected to a multiple-Wireless Access Point network environment, some video packets may be lost, depending on the network traffic load.
- According to the network policy (blocking UDP) of the service provider, the video transmission can be limited to 7 minutes.
 For more details, refer to the descriptions on page 18, <Relay Mode>.
- In addition to the above two situations, you may encounter a network delay or interruption due to the network conditions.
- · Some hubs can have compatibility issues.

Connection using the Wi-Fi Direct function

What is Wi-Fi Direct?

Using Wi-Fi Direct, you can easily connect your camera to a router without a cable.

- When the power is connected, the power status LED lights up in red and starts blinking when boot-up is complete.
- 2. Press and hold the Wi-Fi Direct button on the camera for 5 seconds, and the color of the LED will change to yellow/orange.

- 3. Register and select a camera, referring to the instructions in the mobile guide.
- 4. When the camera connects the server, the LED turns green.
- Set up the wireless network environment in accordance with the < Wireless Network> guidance on page. 20~21.

- The camera can only be registered via mobile.
- You can connect in relay mode if the router doesn't have UPnP. Configuration may differ depending on the router model. Please refer to the router manual.
- Please contact the service provider if you have difficulty connecting to the Internet.

SD card	22		

Registration

The initial settings for SNH-V6431BN can only be done through smartphones. For detailed information on camera registration, please refer to the mobile manual.

PC OS requirement

Windows	Mac
Windows 7/8 or higher is supported	Mac OSX or higher is supported

Starting SmartCam

- 1. From your PC, launch your web browser.
- 2. Go to http://www.samsungsmartcam.com.
- 3. Select preferred language.
- Click <Sign up> or <Starting SmartCam>.

To use the smartcam website properly, please click the 'allow' button on the message 'Allow running Hanwha Techwin SmartCam WebViewer?'

Plug in installation

You can only see the camera image after installing a plug-in.

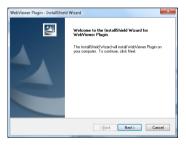

- If you login or click <Starting SmartCam> in a PC where the plug in is not installed, the installation message window will pop up.
- When you install the plug in, the web browser will be terminated and you need to launch it again.
- 1) Click < Download Plug-in>, run the setup file.

For Windows

Click < Next>.

3) Click < Install> to begin the installation.

4) Installation has completed.

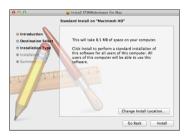

For Mac

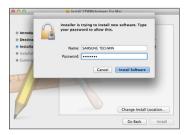

2) Click < Continue >.

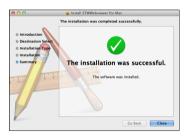

3) Click < Install>.

4) Enter MAC PC password and click < Install Software>.

5) Installation has completed.

5. Enter the requested information, and click < Sign Up>.

- ID: Using alphabetical characters and numbers, make a combination using 8 to 14 letters.
- Password: To strengthen security, create a password with a combination of special characters, numerals and English letters.
- Length and other restrictions of password.
 - A combination of English letters/numerals: 10 digits or more
 - The password must not be identical to your ID.
 - No simple repetitive pattern must be used. e.g., 1212abab, azxsazxs
 - You cannot use 4 or more consecutive letters.
 e.g., 1234, abcd
 - You cannot use 4 or more consecutive qwerty keyboard letters.
 e.g., asdf, 7890
 - You cannot use any letter 4 consecutive times. e.g., !!!!, 1111, aaaa
- Confirm Password: Please enter the password again for confirmation.
- Name: Enter the user name.
- E-mail: Please make sure you enter correct email address as you will have to use the email address to receive temporary ID/password when you lost your user ID or password.

If the camera is already registered

 According to the network connection and setting, click <Next> when the camera LED turns into green.

- Select the serial number of the camera to be added from the camera search list. If the camera is not found, enter the serial number manually.
- Click < Next>.

- Serial number can be found the label on the side of the packaging or on the rear of the product.
- The computer and the camera has to be on the same network router to auto detect the cameras.
- 4. Create < Camera Name > and < Camera password >.
- Click < Next>.

- The camera password is used to block the unauthorized access to your camera.
- Create camera password using alphanumeric characters between 1 to 8 without any space.

After adding the camera, click < Yes> in the wireless network setup pop-up window.

Once the camera is successfully registered, you can check the camera in the camera list.

Live Video

1. Select a camera from the camera list at the upper left hand of the screen.

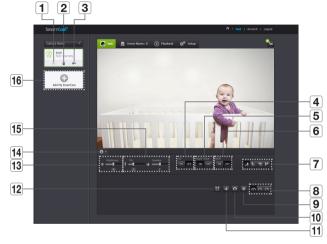

- The gray icon indicates the camera is inactive so you cannot monitor it right now.
- 2. Enter the camera password and click < OK>.

- Check on <Remember> to access your camera without entering the password next time
- If you want to change the Camera password, please refer to < Basic Info> on page 19.
- 3. Live video will be displayed on the screen.

Monitoring options

	Item	Description
1	Default Camera	Set the default camera to monitor in the camera list.
2	Delete Camera	Delete the registered camera.
3	Cancel remembering camera password	Cancel remembering the camera password.
4	LDC	To determine whether or not to use the image distortion correction.

Item	Description		
5 Night Vision	If Night Vision is set <0N>, it will automatically switch to black and white mode in the dark condition and then the IR lamp will automatically operate. If Night Vision is set <0FF>, it does not switch to night vision mode and it will operate in color mode.		
6 WDR	Compensate the backlight by brightening any dark areas and darkening any bright areas.		
7 Flip/Mirror	You can flip/mirror the video image.		
8 Network Speed	Set the network speed (low/mid/high). If the bandwidth provided by your internet service provider is smaller than the recommended value, then the video might get fuzzy or temporary disconnections or delays in the live video may be caused.		
Manual recording	A user can directly save videos in their SD card. If there is an ongoing event now or overwrite to SD card is not checked, and there is storage space of 10% remaining, you cannot perform manual recording. If you move the page or turn off the browser without turning off the manual recording button, it will be saved for a max of 30 seconds and manual recording will be finished.		
10 Capture Image	Live video is saved as one image.		
11 Sound	When enabled, you can hear what's happening around the camera. Some internet service providers do not support audio outputs in relay mode.		
12 Full screen	Converts the current image to full screen size. The system supports Internet Explorer only. If you double-click the screen, the full screen mode is terminated.		
13 Brightness	You can adjust the brightness of the screen image.		

Item	Description
Hide/unhide detailed menu	Click on the [a] icon to unhide or hide detailed setting menu.
15 Audio	Adjust the volume of the built-in microphone and speaker of the camera as appropriate. If you set the mic setting to '0', you will not hear the live audio, and it will not be recorded in your SD card. Note that the Two-way audio transfer function is available only with the smart phone application. The SNH-V6430BNH model does not support a speaker or the interactive audio function.
16 Add a camera	Click the [💿] icon to register an additional camera.

Wireless Network Speed

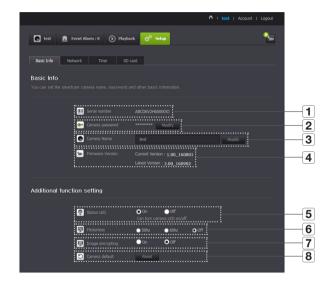

Profile Name	Resolution	Frame rate	Recommended bandwidth
Low Speed Network	VGA	10 fps	0.7Mbps
Mid Speed Network	HD(720P)	15 fps	1.5Mbps
High Speed Network	Full HD(1080P)	30 fps	3.5Mbps

- What is relay mode?
 - If the network condition is unstable, the camera cannot make a normal connection (P2P), so it will set up a connection in relay mode. In this case, you will see the video for the first seven minutes only.
- Relay mode is added feature where the video from the camera is transmitted to smartcam server then retransmitted to the user's computer.
- If you have trouble connection to the camera, visit "http://www.samsungsmartcam.com", go to support page, and refer to "Troubleshooting" on it.
- It is recommended to use one browser at one time.
- The Night Vision video produces a different visibility according to the distance between camera and subject.
- The number of available concurrent users for a single camera may vary depending on the speed of your Wi-Fi router.

Setup

Basic Info

	Item	Description
		,
1	Serial number	You can confirm the serial number.
2	Camera password	Click the <modify>, you can change the Camera password. Enter the current camera password, and type a new Camera password.</modify>
3	Camera Name	Click the < Modify>, you can change the camera name.
4	Firmware Version	You can check the current version and the latest version of your camera S/W.
	0	You can turn on/off the LED in your camera.
5	Status LED	The LED will illuminate when the power supply is reconnected.
	Flickerless	You can reduce the occurrence of screen shaking due to the frequency mismatches with the neighboring lighting.
6		If you use the flickerless function outdoors (in a bright environment), image saturation may occur.
		Encrypts the transmitted image.
7	Image encrypting	If Encrypt Image is activated, the image transmission performance may be affected.
	Camera default	Press the <reset> button to initialize all camera settings other than the network settings.</reset>
8		To reset the camera to its factory default settings, press the [RESET] button on the camera.

- If you change the camera password, you will be logged out and return to the camera password input page.
- Keep the camera password in a safe place as it is used for viewing the live screen of the camera or for changing the display settings.

Firmware update

If the currently used S/W is not of the latest version, update it. If you are using the latest version, then the firmware will not be activated.

1) Click < Firmware >.

2) Click the < 👤 > icon to update the firmware.

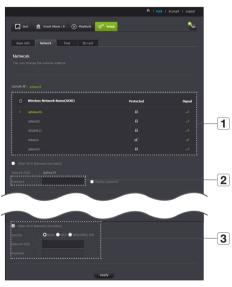

3) When the firmware update is finished, the camera will reboot.

- The duration of the firmware update depends on the size of the firmware file and the network connection speed.
- When executing the firmware update, the camera LED turns purple.
- Please do not cut off the camera power or Internet connection during a firmware update.
 The system may be damaged.

<Wireless Network>

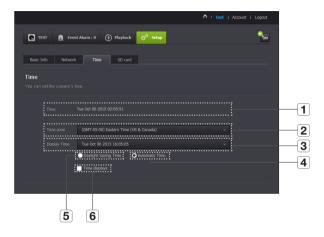

Item	Description
AP (Access Point) list	You will see a list of APs (Access Point) available. Select a desired one from the list of APs (Access Point).
AP (Access Point) password	You can access the network by entering the password set for the wireless router. For the password, contact your network administrator.
3 Hidden SSID	Select a different WiFi network, entering its SSID, the type of security that it uses, and the wireless password configured in the router's settings.

- If you select a non-secured AP (Access Point), you just can access the network without providing a specific password.
- If you cannot connect to the wireless network, check that you entered the wireless router password correctly.

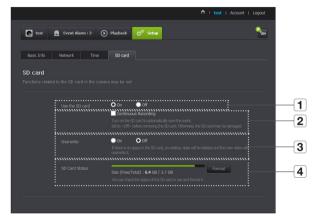

Item	Description
1 Time	Confirm the camera's time.
2 Time Zone	Select your region.
3 Display Time	Select the time format displayed in time setting.
4 Automatic Time	It sets camera's time automatically.
5 Daylight Saving Time	Check this option if you live in a country or region where DST(Daylight Saving Time) is applied.
6 Time to show	Live screen displays the time.

- The time will synchronize with the NTP(Network Time Protocol) server automatically. For this, Internet connection is required.
- You need to set the timezone correctly to obtain the exact time setting.
- The time displayed without Internet connection may not be accurate.

SD card

When an event occurs, it is saved in an SD card.

Item	Description
1 Use the SD card	If you set motion/audio, video will be automatically saved in your SD card.
2 Continuous Recording	Saves the video without being interrupted by events that may occur.
3 Overwrite	If the SD card capacity is insufficient, it will start overwriting the oldest data. When there is storage capacity of 10% remaining, the top notification window will show an alarm.
4 SD Card Status	Check the remaining capacity of your SD card and delete all the data.

- Turn off the camera power or set it to <0ff> before removing the micro SD card. If you fail to do this, the data in the micro SD camera may be damaged.
- Please note that the content of a micro SD card used for other purposes may be deleted when it is mounted in the camera.
- Be careful, as the Micro SD memory card may pop out when you press it hard and release to remove it from the camera.
- Do not forcibly insert it in the reverse direction. The Micro SD memory card may be damaged.
- The following micro SD cards are recommended for this camera.

Manufacturer : Sandisk, Transcend Storage device : MLC or higher Transfer speed : Class 10 or higher

If you use an SD card other than those which are recommended, a malfunction might occur during video recording.

- Micro SD card of max 128GB is supported and a FAT32 file system is supported.
- It is recommended to use the micro SD card after formatting it. Regularly formatting the memory card will help extend its life.
- Video is recorded at at 1280X720 resolution.

Event Alarm

You can check the event alarm that occurred.

Item	Description
1 Delete by dates	Delete all the event alarms on the date.
2 Delete All	Delete all the event alarms for thirty days.
3 Display Events	Displays the number of events occurred in the 30 day list.
4 Arrange by types	Arrange the event list by event types.

Playback

You can play a video saved on the SD card and download it to the PC.

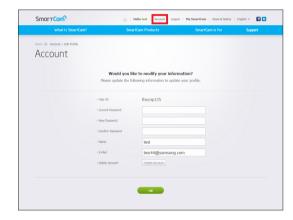

Item	Description
1 Type	Set the event type to search for during the search period.
2 Date	Set the search date for the data saved in your SD card.
3 Play/pause	Play and pause video.
4 Search	Perform event searches.

	Item	Description
		Downloads a manually recorded video/motion/audio event saved on the SD card to the PC. Downloading is only available when the computer and the camera
5	Downloading a recorded video	are connected to the same network router. Downloading may be unavailable if the network is unstable or there is access by multiple users.
	The function to download a recorded video is supported by the Smart Cam mobile app for Android smartphones (not supported in the iOS app).	
6	Refresh	Renew the events displayed in timeline.
7	Timeline	Use the timeline to play the video in the desired time.

Troubleshooting

If you encounter a problem with your system, see the table below to solve the problem as quickly and easily as possible. Please follow the instruction below:

D., H.	A.P
Problem	Action
I forgot my user ID/ password.	Move to "Log-in page → Forgot your ID/Password?", and enter the registered e-mail address to which we will send you the user ID and/or a new password. It can be spammed out depending on the policy of the email server. After logged in, it is advisable to change the temporary password provided.
Camera is not connected to the wireless hub.	If the green light on the camera state LED turns off frequently, it may be because the camera is installed in an environment with a poor wireless Internet connection. Check the password for the wireless hub and try again.
After logged in, I failed to register the camera.	- Check whether the serial number entered matches the label on the camera Enter the correct password for the camera registered again and try to register the camera again Check whether the LED light of the camera is yellow or orange If this fails to resolve the problem, factory reset the camera and repeat the procedure from the beginning. (To factory reset the camera, press and hold the RESET button on the camera for 10 seconds. The camera will be restarted when the camera is factory reset.)

Problem	Action
The video from the camera is temporarily lost.	 The video from the camera can be delayed according to a network delay. Please check if the camera is installed in a place of proper wireless Internet communications.
No sound is output from the video.	 Click the Voice icon in the video playback page, or check if the voice is turned On in your smart phone app. Some internet service providers do not support audio outputs in relay mode.
I forgot my Camera password.	You must create a new camera password. Press and hold the camera reset button for 10 seconds to factory reset the camera, and then register the camera again.
I want to change my password and/or email address.	After logging in, click on the < Account>. Select the item (password, or email address) and enter your information.
Camera will be connected in a relay mode.	Check the UPnP setting of the router. A network upload speed of at least 3.5Mbps (1080p) is recommended. Depending on the policy of your service provider, you can access in relay mode.

Hanwha Techwin cares for the environment at all product manufacturing stages, and is taking measures to provide customers with more environmentally friendly products. The Eco mark represents Hanwha Techwin's devotion to creating environmentally friendly products, and indicates that the product satisfies the EU RoHS Directive.

Correct Disposal of This Product (Waste Electrical & Electronic Equipment)

(Applicable in the European Union and other European countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.
