

FULL HD VIDEO SECURITY SYSTEM

Quick Start Guide

Troubleshooting

If you are experiencing video loss, verify that all cables are properly and securely connected to the DVR.

- Check your Network Connection
- Check your Username and Password
- Restart the DVR if you have trouble connecting.
 - ✓ Main Menu > Shutdown > Enter Username & Password > Click "Reboot"
 - ✓ To reset your DVR to factory settings, refer to the User manual.

For more information about your product, please download the User Manual from "wisenetlife.com".

SDR-75306	SDC-79446BF	60FT BNC Cable
Network Cable	HDMI Cable	Remote Control / Remote Control Battery (AAA x 2)
Mouse	1 to 8 Way Power Splitter	Screw x 3EA (per Camera) / Anchor x 3EA (per Camera)
Power Adapter for DVR / Power Adapter for Cameras	Printed Material	

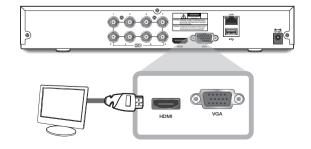

1. Connect the camera's video input (yellow) and power supply (red) connectors to the BNC extension cables. Then connect the BNC video input (yellow) to the video input port on the rear panel. (Repeat Step 1 for the remaining cameras.)

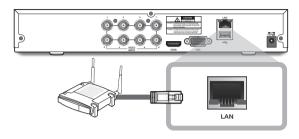

2. Connect the mouse to the USB Port on the front or back panel of the DVR.

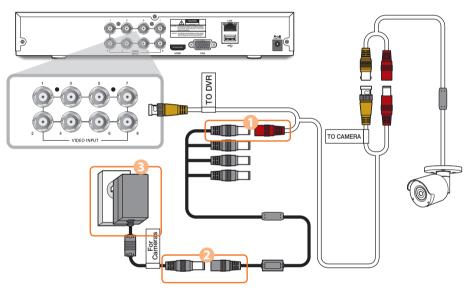

3. Depending on the monitor port, connect the HDMI or VGA cable from your monitor to the HDMI or VGA Port on the rear panel.

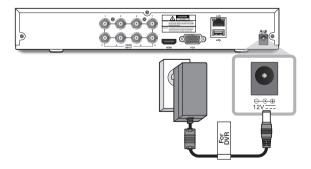

4. Connect one end of the Ethernet cable into your router's LAN port, and the other end of the cable to the Ethernet port on the rear panel.

5. Connect the camera's power supply (red) to the power splitter. Then connect the other end of the power splitter to the power adapter for Cameras and plug in the adapter to a wall outlet. (Repeat Step 5 to connect the cameras to the second set of power splitter and power adapter.)

6. Connect the power adapter for DVR to the DC 12V port on the rear panel and the power plug into a wall outlet. The DVR will automatically power on and the startup wizard will appear on your monitor.

Startup Wizard Guide

Change your password on a regular basis.

W Login			×	
Language	ENGLISH		~	
Device ID	000000		-	
New Admin Name	admin			
New Admin Password	Show Pass	word	_	
Confirm Password				
	Show Pass	word		
	Apply	Cance	el .	

Please create a user name and password for your device. Password MUST be 8~13 characters long. When password is 8~9 characters long, it should be with at least a combination of letters, digits and special symbols. If it is 10~13 characters long, it should be with at least a combination of two types of characters. 4 or more contiguous or repeated characters or key arrangement are prohibited, for example 1111, 1234, abcd, qwerty.

1. After DVR startup is completed, the startup wizard will be displayed. Click "Start Wizard".

2. Network

In DHCP mode the router will automatically assign an IP address to DVR.

If the DVR fails to obtain an IP address, refer to the DVR Router Guide. If the problem still cannot be resolved, contact technical support.

Once you've set up your system, you can install the WiseView app for remote viewing and access to your cameras from anywhere, anytime.

- 1. Open Google Play or the App Store and download the free Wiseview app.
- 2. Once installed, open the WiseView app.
- 3. Tap the dropdown menu and select Device
- 4. Tap [+] to add a new device. Under Device Name, create a name for your DVR.
- 5. Select a Login Type IP/Domain, P2P ID, Product ID. (The following steps applies only to the QR code setup. For more information about IP/Domain and Product ID login, refer to the user manual.)
 - ✓ QR Code only works with P2P ID Login.
- 6. Tap the QR code image next to P2P ID. Scan the QR code either on the Information page on your monitor or top of the DVR. (See image below)

- 7. Enter in the Media Port, User Name, and Password. If you want change the default port, you must manually enter the new port number.
- 8. Tap "Save" when finished to connect to the DVR.

App Interface
